

Industry: Charities

Investment: £5,000,000

Terms of Funding:

- Seeking £5m
- £2500 per share
- Ongoing commitment for funding using interest.
- Monthly D/D from individuals
- Gift Aid - 10%

Key Features:

- £5m Fund
- 1% will be paid on capital invested annually, this will be split each year over the 4 quarters starting from Q5 onwards.
- Extra 1% during year 5 on initial capital i.e. 2% instead of 1%. This will be split each over the 4 quarters like in the previous 4 years and initial capital then returned at the end of Yr5.

Market:

- Charities exist solely to provide help to those who need it most. They constantly are looking for ways to raise funds by providing different vehicles to raise money.
- Challenges are set and monetary rewards are earned by completing the task.
- Red Nose Day - Comic relief being the day that celebrities, groups and individuals are asked to join in and get the UK focused on giving for so many good causes.
- As long as humans are alive then causes will exist to give hope, joy and provide for basic needs of others.

Team:
(Upon request)

Challenges

- Donations are how charities typically survive. Cashflow and constant battle against inflation makes it hard for some charities to offer their services to everyone.
- Our Philanthropy Consortium can only offer Charities 2000 shares in this round to make it affordable.
- UK population 67,736,802 -2023 World population 8,045,311,447- 2023 Living and only 1% of the population are most able to give back comfortably.

Solution

- Create a fund to protect the funds raised to enable the charities to survive and continue doing the good work they do. This fund will ensure that, capital placed into it for the charities will enjoy a return on the capital deployed.
- Up until now this has been a challenge for the Charities as many of the funds raised is purely to provide year on year.
- Year on year, charities face the same dilemma, by getting the capital working for the fund, it provides some stability for the charities by providing for running costs.
- We are using a tried and proven method, developed successfully over 2 decades, to get the capital working on behalf of the fund.
- This means that the capital will be safe and can generate a fixed return during the 5-year lifetime of the fund.
- The initial capital is then returned to the charity after the terms have been completed.
- This could prove to be an ongoing income for many years

Who

- Charities who would benefit from receiving money long term by being part of this Consortium.
- Individuals who already give to various charities by making their hard earned cash work harder.
- Encourage others to join the cause as an opportunity to support fellow human beings during difficult times.

Size of the opportunity?

- To reach our target of £5m the minimum investment for a share from a Charity is £2.5k allowing for a total of 2000 charities to be involved.
- Your charity decides what the % share you want to raise.

Fund Details

- The Fund will be open for a 6-week period, to allow you to engage. Once your capital has cleared into the fund account, in return will be issued with a share note % of your share. i.e. 2.5k = 0.04%.
- Once the totals are reached the fund will close and the capital will be deployed the following month.
- There will be, a closing out period at the end of the 5 years, this may take between 0 and 180 days, all charities will be well informed in advance of the closing out period.
- The Fund will require you to provide your Name, Charity number, list of trustees, bank details for future and any relevant information that will help you be included in this fund.
